

How Recruitment Agencies Can **Boost Efficiency** Without Growing Overhead

One of the recruitment industry's biggest challenges is systems that don't talk to each other.

Without one integrated solution, your finance team cobbles data together from accounting, CRM, and time tracking systems—resulting in wasted time and expensive mistakes.

Instead of hiring more spreadsheet wranglers, [explore a smarter, faster way to run finance.](#)

Here are 5 ways **Sage Intacct for Recruitment** empowers recruitment agencies to [boost efficiency without growing overhead.](#)

1. GET INSTANT VISIBILITY WITH REAL-TIME REPORTING

COMMON CHALLENGE:

Reporting takes too long—and is already outdated. By the time you've pieced together spreadsheets for P&Ls, aged debt, or placement profitability, the information is old—and often inaccurate.

SOLUTION:

With Sage Intacct, you can access live dashboards, pre-built reports, and real-time data across clients, recruiters, and placements—without waiting for manual exports.

QUICK WIN:

Replace month-end Excel reporting with a live profitability dashboard to track performance as it happens.

2. TRACK PROFITABILITY BY CLIENT, ROLE, OR RECRUITER

COMMON CHALLENGE:

Most systems don't let you see how profitable individual placements, clients, or recruiters are—leaving you blind to what's driving margin.

SOLUTION:

With Sage Intacct's multidimensional reporting, you can tag transactions by client, department, recruiter, or job role to get detailed insights.

QUICK WIN:

Tag invoices and expenses with dimensions like client or recruiter to unlock powerful profitability analysis.

3. CLOSE THE BOOKS FASTER WITHOUT BURNING OUT YOUR FINANCE TEAM

COMMON CHALLENGE:

Month-end is slow, stressful, and packed with manual tasks. Finance teams work overtime just to get the basics done.

SOLUTION:

With automated reconciliations, smart workflows, and real-time visibility, Sage Intacct helps you cut days off your close.

QUICK WIN:

Automate bank feeds and reconciliations to shave days off your monthly close and reduce errors.

4. SAVE TIME WITH AUTOMATED SUPPLIER INVOICE APPROVALS

COMMON CHALLENGE:

Paying your suppliers feels like a never-ending admin task. Manually entering invoices and chasing approvals through email or paper slows everything down and risks errors.

SOLUTION:

Sage Intacct automates your accounts payable process with digital invoice capture, smart approval workflows, and real-time visibility into what's due and when.

QUICK WIN:

Use digital invoice capture to automatically feed supplier invoices into your finance system and route them through pre-set approval workflows—cutting out manual data entry and email chasing.

5. IMPROVE CASH FLOW WITH AUTOMATED PAYMENT FOLLOW-UPS

COMMON CHALLENGE:

Many agencies struggle to keep up with overdue invoices, especially when finance teams are small. Manually tracking aged debt wastes time and slows down collections.

SOLUTION:

Sage Intacct automates payment reminders, tracks outstanding balances, and follows up without extra admin. It's proactive credit control—built in.

QUICK WIN:

Set up automatic reminder emails for overdue invoices to improve cash flow and reduce the burden on your finance team.

ABOUT VISION33

Vision33: Empowering Recruitment Agencies With Sage Intacct

Vision33 is a multi-award-winning Sage Intacct partner and Sage Platinum Club winner, renowned for its expertise in implementing, integrating, and supporting Sage Intacct.
