
Transforming Recruitment

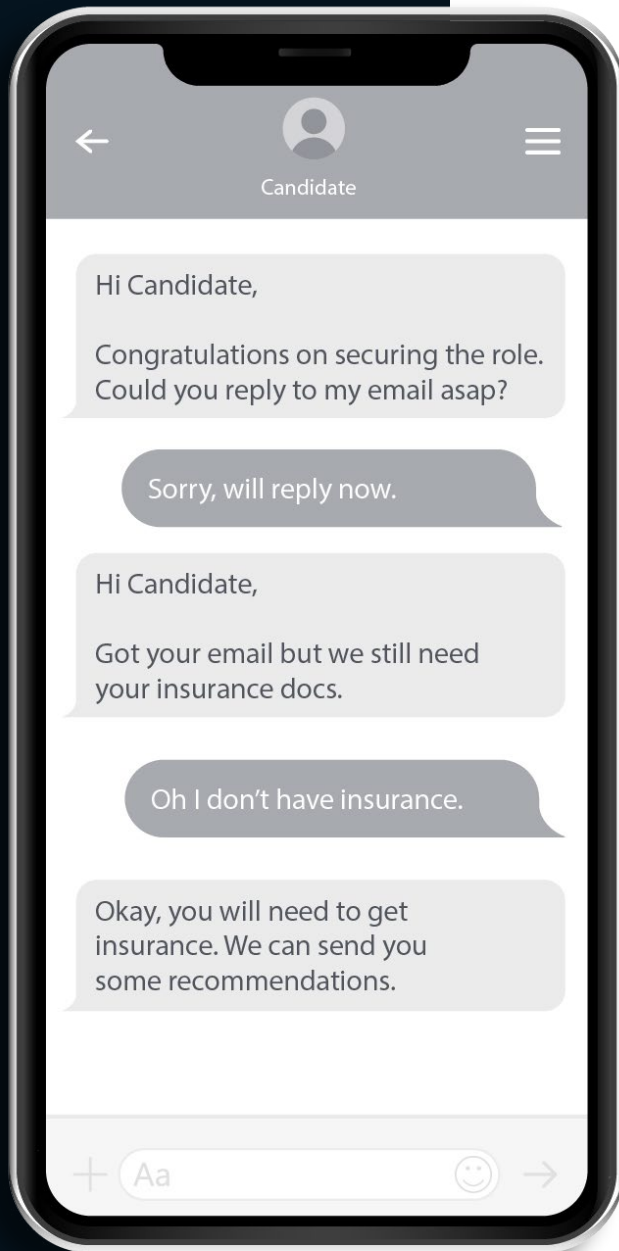

ELEMENTS

A KINGSBRIDGE TECHNOLOGY

Everyone knows how tough the onboarding process can be with multiple systems, spreadsheets and manual checking.

Tracking expiry dates, right to work, DBS, adversecredit, qualifications – the list goes on.

Let's do things differently.

Onboarding and compliance

Coupled with ever changing legislation, the pressure on recruiters' compliance function has grown:

Spending too much time on repetitive tasks which are vulnerable to human error

Sales teams worrying about onboarding rather than focusing on the next placement

Double keyed and inaccurate data due to multiple systems

Frustrating candidate experience

Risks associated with GDPR breaches and failure to verify Right to Work

Introducing Elements

Elements combines your entire onboarding process into one place. By automating repetitive and time consuming tasks, Elements will make onboarding faster and more accurate.

Everything under one login

Don't miss expiring documents.

Reduce costly mistakes

Focus on the next placement

Increase productivity

Better candidate experience

Highlight compliance issues quickly

Improve GDPR and Right to Work compliance

Onboarding candidates with Elements

Elements uses AI and automation to take on repetitive and error prone tasks whilst cross referencing with external services like Companies House & HMRC to drive accuracy.

Create individual workflows specific to each client

Set reminders to automatically notify your team and candidates of expiring documents like insurance and qualifications

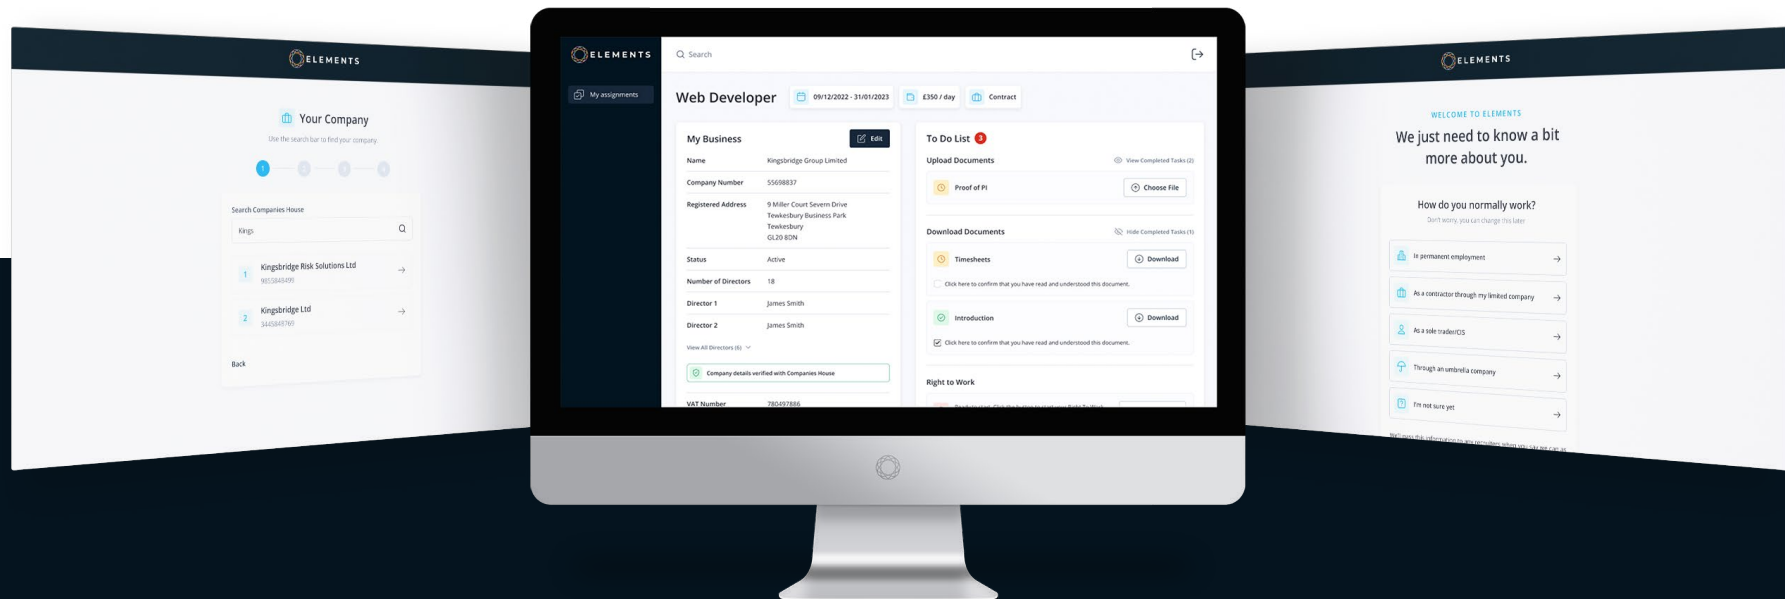

Verify bank account details

Instant Business & VAT verification with government agencies

Generate an array of checks including Right to Work, DBS and Adverse Credit
